# The Manama/9 Store. Bicycle Reliability

WANAMAKER bicycles never disappoint. Under whatever name they may be sold, if they are sold here, they are wheels to rely upon. Putting cast-iron where steel should be, makes a wheel cheap but jeopardizes the rider. "Scamp" work of any sort is always objectionable, but in a bicycle it is something more, -it is dangerous.

We have always been in the lead in the lowering of bicycle prices, but we have never lowered the "factor of safety."

Our bicycle ideas are high and our bicycle knowledge profound. When we say of a wheel "It is the best we know," it is a remark to be taken seriously.

The three best wheels we know for their respective prices are

## The Orient, \$50, \$65 and \$75. The Humber ('98 models), \$40, \$42, \$45. The Continentals, \$25 and \$26.50.

These are what we mean by "reliable" wheels. Mind you this, -they are not "the best we know" because we sell them. We sell them because they are the best we know.
